Ideation Phase
Define the Problem Statements

Date	3 October 2026
Team ID	SWTID-2026-9684
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	2 Marks

Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A Service Desk Agent who logs and triages Incidents in ServiceNow	Create High-impact Incidents quickly with complete and correct data	Incidents get saved without an Assigned To / Assignment group, or with an Urgency that does not match the Impact	The Incident form relies on my own awareness and manual checks; nothing enforces the business rules at the time of entry	Frustrated and worried about misrouted tickets and missed SLAs
PS-2	An Incident Manager / ServiceNow Administrator responsible for data quality and reporting	Make sure every Incident meets defined business rules before it is submitted	Required fields are skipped and the State can be changed straight from the list view, bypassing the form	There are no UI Policies or Client Scripts to control field behaviour, validate on save and restrict list edits	Concerned and unconfident about the accuracy of reports and SLA compliance
