Acceptance Testing – UAT Execution & Report Submission

1. Purpose of Document

The purpose of this document is to summarize the test coverage and reported issues for the Implement Client Script & UI Policy (Incident) project at the time of User Acceptance Testing (UAT).

2. Defect Analysis

The supplied project testing results do not report an open defect. The tested behaviors are described as working as expected.

3. Test Case Analysis

Eight project-specific UAT scenarios are documented below, covering UI Policy behavior, Client Script validation, save prevention, list-edit blocking, and form-based updates.
